SSW WEIGHT: M:300G W:250G

WAVE PLATE TECHNOLOGY delivers smooth feeling stability without increasing weight and offers a more propulsive transition.

MIZUNO ENERGY foam throughout the entire midsole delivers the ideal balance of softness, energy return and durability for everyday training.

Smoother and softer Upper removes all firm materials for the ultimate seamless feel, while the Smooth Stretch Woven upper offers a modern, dynamic fit that adapts to and supports the foot.

Great fit for ORTHOTICS.

TECHNOLOGY COMPARISONS

WHO FOR?

UPPER: Engineered Mesh Upper with PU Print execution.

OUTSOLE: Outsole with horizontal flex grooves throughout the forefoot for added flexibility.

UPPER: For the first time the Wave Rider 26 will offer a breathable Jacquard Air mesh as well as our brand new Smooth Stretch Woven which provides soft, adaptive and supportive fitting while maintaining a premium look.

PROPULSIVE OUTSOLE: A single vertical flex groove throughout the forefoot delivers a snapper transition, enhancing the propulsive experience & snappier toe off.

■ The Wave Rider 26 is the ideal daily trainer for someone seeking a stable, lightweight and neutral running shoe which offers balanced cushioning that can handle everything from easy runs, long runs and faster tempo sessions. ■

MIZUNO WAVE

MizunoEnergy

Parallel Wave Plate design for a smooth and stable transition suited to a neutral runner.

Full length MIZUNO ENERGY midsole for high quality cushioning and energy return.

MIZUNO WAVE

MizunoEnergy

A reengineered Wave Plate design offers a raised lateral and medial sidewall to offer more support and a smoother transition from heel to toe.

17% more MIZUNO ENERGY midsole foam offers significant comfort and performance increases, delivering softer cushioning and more energy return while maintaining durability.
